To: [Binder / leather-embossing house — name and address]

Re: Request for written quotation — hardcover fine binding in lambskin with embossed and foil-tooled devices, production run of 5,000 units

Dear Sir or Madam,
I am preparing a fine press-style edition for publication in 2027 — a Teacher's Edition of Black's Law Dictionary, Second Edition (1910, public domain text) — and I request your written quotation for the binding and embossing work specified below. I am asking several houses for quotes on identical specifications so the figures can be compared fairly; please quote on the specification as written and note separately anything you would advise changing, and why.

I. The book

• Title: Black's Law Dictionary, Second Edition (1910) — Teacher's Edition, styled the Ma'at Feather (MAGVS) Red Letter Edition: dictionary text verbatim, with citations and scripture set in blood red.
• The typeset edition runs to roughly 3,700 pages and will be issued in volumes for binding; please quote per volume and per complete set, and advise the volume split your bindery considers sound (expected range 1,200–1,900 pages per volume).
• Trim size: approximately 7 × 10 in, to be confirmed against the final typesetting; please state the trim sizes your house works to and any you recommend for a reference volume of this weight.

II. The binding specified

• Hardcover, full lambskin, dyed purple as the primary field.
• Accents in green and gold, high-contrast against the purple — purple field, green accent leather or inlay, gold tooling.
• Embossing / tooling — three devices plus spine lettering: (1) The Ma'at Feather, a single upright feather, embossed and gold-tooled, principal device of the front board. (2) The Seal — a circular seal (purple field, gold rim lettered TVRRIS VERITATIS, a triangular lattice of gold nodes within a laurel rim), tooled on the front board and repeated on the back board; artwork supplied by us as a high-resolution master, die-cutting to your specification. (3) The Sign — a unicursal hexagram, tooled on the back board. (4) Spine (bindcover) — title, edition, and volume number lettered in gold, with the feather device repeated at the head or tail of the spine.
• Quote blind embossing and gold-foil tooling as separate line items where your process prices them separately; state whether your dies are brass, magnesium, or other, with die life at this run size.

III. Finishing options — quote each as an add-on line

• Gilt or coloured page edges. • Ribbon markers (one and two, colours to the palette). • Sewn

headbands in accent colours. • Slipcase or clamshell, lambskin-covered, per set. • A single bound proof / sample copy ahead of the run, priced separately, with its cost credited against the run if your house so offers.

IV. Figures requested

• Per-unit price at 5,000 units, itemised: materials, die-making (each device listed separately), tooling/embossing passes, binding, finishing.
• The same per-unit figure at 1,000 and at 10,000 units, for comparison.
• One-time costs separated from running costs.
• Lead time from approved proof to delivery, and the proofing stages included.
• Shipping terms to Michigan, and whether freight is included or extra.
• Payment schedule your house requires.

V. Standing terms of this house

• Artwork, dies struck from our artwork, and the devices themselves remain the property of the author; dies are to be held for re-runs or returned, as your quote states.
• No substitution of materials (leather species, board, foil) without written approval; the lambskin and the palette above are the specification, not a suggestion.
• The quote should state its validity period.

I can supply the seal artwork, the feather and hexagram devices, and a rendered visual specification of the front board, back board, and spine on request.

Respectfully,
Johnathan “Qasparr” Monroe (Greek, -ARR, All Rights Reserved, Without Prejudice)
