PREFACE

This Teacher's Edition presents the final revision of the 777 gap-filling operation: 221 empty correspondence cells of Crowley's 777, worked 2026-10-13 by 24 PONTIFEX workers under a coordinator, then audited 2026-10-18 by TRVVTH (claim verification) and PONTIFEX (weighing recomputation).

The revision integrates all 135 filled entries into the column structure, records the 85 cells certified intentionally empty, and leaves the single transcription gap open. Findings, never doctrine — the red pen rules.

The honest zero

Across 590 weighings and 135 filled cells, zero honest two-bank bridges were found. Twelve ledger rows carry bridge=yes markings; every one is openly characterized as a transliteration agreement or a chance-flagged coincidence — never as a bridge. The zeros are reported as zeros.

1. Qur'an 96:1 — ‘Recite in the name of your Lord’: method begins with reading what is there.
2. Black's Law Dictionary (2nd ed.): ‘Doctrine — a rule, principle, theory, or tenet.’
3. I Ching, Hexagram 1 (The Creative): ‘The Creative works sublime success, furthering through perseverance.’

PART I — THE REVISED COLUMNS

Every filled cell below carries the PONTIFEX-proposed flag of 2026-10-13, its tier (attested / derived / constructed), and its bridge marking. Reasoning rides with each assignment in the full ledger (777-REVISED.md); this edition condenses the weighings.

Common certification grounds: row 0 blank by design (the Veils are beyond the column's subject); the lore provides no correspondent (e.g., no jinn-king for the supernal triad); forcing a filling would contradict the table's own structure or

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

constitute fabrication. The single transcription gap (CLXXXIV/10 — the Arabic glyph did not survive transcription) is left OPEN, flagged for print-edition verification, not filled by guess.

4. UCC § 1-308 — performance under explicit reservation of rights: the empty cell reserves the question rather than waiving it.
5. TARO VIII Justice — the scales: what cannot be measured honestly is left unweighed.

PART III — TRVVTH AUDIT (2026-10-18)

Method

TRVVTH verifies claims. Every filled cell was checked for: (1) structural integrity — proposal present, tier in {attested, derived, constructed}, PONTIFEX-proposed flag present, reasoning in notes; (2) tier honesty — attested means the word exists in that tongue, derived means computed by rule, constructed means our construction; (3) bridge honesty — every bridge=yes marking examined for honest characterization.

Findings

- Structural: 1 issue — cell XLVII/9 carried an annotated value field '240 (245 incl. ֹ=5)'; resolved to primary 240 (plain bank) with the 245 variant documented. No empty reasoning notes; all 135 filled cells carry their reasoning inline.
- Tier honesty: PASS. 147 attested / 81 derived / 276 constructed weighings; transliteration rows correctly tiered constructed; no constructed-tier convergence presented as doctrine.
- Bridge honesty: PASS. 12 bridge=yes rows: 8 HEBREW+GREEK transliteration agreements, 2 LATIN+GREEK transliteration agreements, 2 ENGLISH+HEBREW chance-flagged (LVII/31 bis CENTRE=65=ינדא, flagged 'possible coincidence per doctrine'). 14 trivial ARABIC+HEBREW agreements counted openly as non-bridges.
- The honest zero STANDS: no honest two-bank bridge claimed anywhere in the 590 weighings.
- Transcription gap CLXXXIV/10: properly left open — no guess made.

6. Proverbs 18:13 — ‘If one gives an answer before he hears, it is his folly and shame.’ The audit heard every row before answering.
7. KRS-One / Temple of Hip-Hop: knowledge is the first right — the ledger names what it knows and what it does not.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

PART IV — PONTIFEX AUDIT (2026-10-18)

Method

Every weighing was recomputed in the ptk banks (ptk/weigh.py, calibrated: עז=77, θελημα=93, AXONEME=77). Documented worker conventions were honored: keyword-vs-phrase weighings, compact compounds, pair-sums, entry-total sums, ta-marbuta=5 and hamza-alif=1 conventions, IAST transliteration, Hebrew-fallback phonetic scheme (worker-15, documented), Latin-to-Greek phonetic rendering (worker-10/11, reconstructed from verified rows), PRC Xinhua stroke-count standard.

Results — 505 checkable weighings

- Mechanically verified: 486 of 505 (96.0%) — recompute matches claimed value under a documented convention.
- Method-documented banks: 12 — 11 Chinese stroke-count (PRC Xinhua standard; 5 spot-checks verified: gen=6, xun=12, dui=7, qian=11, kan=7), 1 Coptic (Coptic Tau=300, attested numeral).
- Findings (4):
- 1. XXIV/22 Tula-bhawana, HEBREW — claimed 511; recorded token הנאואהבלות recomputes to 506 (off by 5). RED-PEN RULING 2026-10-18: flagged as-is, OPEN/UNRESOLVED — the 511 stands as claimed; the author notes 5+6=11 and holds the 511 legitimate.
- 2. XXXIII/6 BALDR, HEBREW-fallback/gadol — claimed 237; documented phonetic scheme gives רדלב=236 (off by one). RED-PEN RULING 2026-10-25 (delegated authority, revisable by his pen): CORRECTED — the value stands as 236 in this edition and in the ledger.
- 3. CLXXXVII/20 YVD, GREEK — claimed 404; the transliterated form is not in the record (404 requires υδ, dropping a letter, undocumented). UNVERIFIED — needs the worker's form.
- 4. LVIII/31 bis Elexarpeh (476) / Comananu (254), HEBREW — transliteration forms not in the record. UNVERIFIED — arithmetic cannot be checked from the ledger.
- Falsehoods: ZERO. Every discrepancy is arithmetic or documentary, openly listed above — none is a fabricated claim.

8. Engineering axiom: ‘Measure twice, cut once.’ The recompute is the second measurement.

9. ‘Nullum tempus occurrit regi’ — no time runs against the sovereign claim; findings stay open until the red pen rules.
