Black's Law Dictionary

The Married Teacher's Edition

Second Edition (1910) × Fifth Edition (1979)

A Scientific Illuminist marriage of attestation

Authorship attributed exclusively to Johnathan 'Qasparr' Monroe (Greek, -ARR, All Rights Reserved, Without Prejudice) this XVIII day of October, Dies Solis, Sol in Libra, Anno V:xii e.n. (2026 e.v.)

Classification: Enterprise • Educational • Research & Development

Method of Science, Aim of Religion

Flagpole of Claim and Coinage: Johnathan 'Qasparr' Monroe, ARR, All Rights Reserved, Without Prejudice. Right of claim hereby reserved and coined under the authority of the Living Man.

The Marriage — What This Edition Is

Hypothesis. Two editions of the same dictionary, sixty-nine years apart, can be taught as one book — if every claim about the younger is attested by the elder. The second edition (1910) is public domain: its entries may be quoted whole, and they are. The fifth edition (1979) is under copyright until 2074: its entries are summarized, never reproduced, and its headwords and counts are treated as metadata. The marriage therefore runs one way by law and both ways by method: the 1910 text is the attestation anchor; the 1979 analysis is the thing attested.

Method. Part I is the Teacher's Edition of the second edition — parser, analytics, TRVVTH sample audit — kept intact. Part II is the analytical companion of the fifth edition — kept intact, with its copyright-boundary notice standing. Part III is the new work: attestation tables joining the 13,145 parsed 1910 entries against the 1979 headword census. Every table carries its method note: how the sample was drawn, N, and the join key (uppercased headword, exact match). Where no 1910 text bears on a claim, the table says so openly — never force-fit, never padded.

Result. The turnover every reader feels but few measure: 3,881 entries survived, 9,011 lost, 18,098 new — a re-founding, not a revision. The lost Latin-maxim apparatus is shown in the 1910 words themselves. The sovereignty drift is shown against the full 1910 entry. What the fifth edition tightened, the second edition's own text proves.

Notes.

1. Black's Law Dictionary, 2nd ed. (1910), public domain — the attestation anchor.

2. UCC § 1-308 — reservation of rights: what is summarized is not waived, and what is private stays private.

3. Qur'an 96:1 — read what is there; the 1910 page is read, the 1979 page is counted.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

PART I

The Second Edition (1910)

Teacher's Edition — Study Guide & Analytics

Parser, analytics, and TRVVTH sample audit, kept intact.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

I. Charge and Scope

Hypothesis. A law dictionary can be taught the way it was built: entry by entry, with the machinery visible. This Teacher's Edition therefore does two things and refuses a third. It teaches how to read a Black's entry — headword, body, citations, cross-references — and it publishes the analytics of the machine that first split the 1910 second edition's raw OCR into entries: counts, distributions, citation tables, cross-reference resolution, and OCR-artifact frequencies, every number recomputed from the parsed data. What it refuses: it does not reprint the dictionary, and it does not call anything “audited.”

Method. The parse (entries.json, 13,145 entries) is the instrument; the analytics are its readout; the TRVVTH sample audit (§VI) is the first check of the instrument against the doctrine of TRVVTH-METHOD.md. Per that doctrine's sampling rule, the strata here are labeled exactly as earned: the text is parsed, the sample is sampled, and every check that requires the scan image stands OPEN. Nothing in this Edition is presented as verified against the printed page.

Observation. The parser recovered 13,145 entries from the OCR body, against an independent rebuild count of 12,941 from the same scan — a +1.6% delta, bounded and discussed in §III. The sample audit ran 369 text-level checks over 52 stratified entries: 205 passed, 156 stand open pending the scan, 8 flagged as findings.

Result. The Edition that follows: provenance (§II), parser method and limits (§III), analytics (§IV), artifact classes (§V), sample audit (§VI), teaching layer (§VII), open questions (§VIII), authorities (§IX), colophon (§X).

The content test — four elements, stated precisely

- Inputs: the public-domain OCR text (blacks-2e-1910_djvu.txt, 7.8 MB, ABBYY FineReader via the Internet Archive scan ALawDictionary1910); the TRVVTH audit doctrine (audit/TRVVTH-METHOD.md); the system-wide directive format (ordered 2026-10-18); the author's standing output guide.
- Processes: deterministic entry parsing with logged diagnostics; recomputed analytics (PONTIFEX discipline — no number without its derivation); stratified sample audit with text-level checks and scan-open findings; teaching prose kept separate from Black's text.
- Outputs: this companion Edition (study guide + analytics). No binding effect is claimed; no entry text is altered; the residual claim — the author's coinage, flag, and red-pen layer — is preserved whole for the 2027 restoration.
- Tolerances: the Edition becomes opinion the moment a number is shown without its derivation, or a check is called “audited” without scan evidence. Both failures are recorded here as failures, without prejudice, under the author's name.

Notes.

1. Law — Black's 2e defines the instrument's own verb: “As a verb; to make an official investigation and examination of accounts and vouchers. As a noun; the process of auditing accounts” [Black's Law

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Dictionary, 2d Ed. (1910), AUDIT, p. 105].

2. Scripture — “Prove all things; hold fast that which is good.” [1 Thessalonians 5:21, KJV]. The sampling rule is this verse, engineered.

3. Hip-hop — “Don't believe the hype” [Public Enemy, “Don't Believe the Hype,” 1988]: the Edition's refusal to call parsed text “audited” is the same discipline, applied to our own work.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

II. Source and Provenance

Hypothesis. A restoration must know exactly what it is restoring. The work at issue is A Law Dictionary: Containing Definitions of the Terms and Phrases of American and English Jurisprudence, Ancient and Modern — Black's Law Dictionary, Second Edition — by Henry Campbell Black, M.A. (1860–1927), published at St. Paul, Minnesota, by the West Publishing Company in 1910, under copyrights of 1891 and 1910. Both copyrights have expired; the edition is public domain, verified from the title-page imprint in the source text itself.

Method. The working source is the raw OCR text of the Internet Archive scan (identifier ALawDictionary1910, Google Books digitization, Public Domain Mark 1.0), produced by ABBYY FineReader: local file source/blacks-2e-1910_djvu.txt, 7.8 MB, 1,225,278 words, 221,769 lines, 1,322 printed pages per the project record. The file is treated as immutable: the parser reads it and never edits it. An independent rebuild of the same scan (maxwell-black/blackslaw-dictionary, 12,941 entries, from the same IA DjVu XML) exists as a cross-check — never as a source. Where counts disagree, the scan decides.

Observation. The author's own preface to the second edition states the plan, and the plan is worth quoting because it governs how every entry below should be read:

> “In the preparation of the present edition of this work, the author has taken pains, in response to a general demand in that behalf, to incorporate a very great number of additional citations to decided cases, in which the terms or phrases of the law have been judicially defined. The general plan, however, has not been to quote seriatim a number of such judicial definitions under each title or heading, but rather to frame a definition, or a series of alternative definitions, expressive of the best and clearest thinking and most accurate statements in the reports, and to cite in support of it a liberal selection of the best decisions ...” — Henry Campbell Black, Preface to the Second Edition (1910)

Result. This is why the second edition is the edition the author cites — e.g. “Sealed” in the pqpe-native demonstration apparatus — and why it anchors the 2027 restoration: the fifth edition (1979) remains under copyright until 2074 and cannot be republished, while the 1910 text is free. A definition framed from “the best and clearest thinking” in the reports, with “a liberal selection of the best decisions” in support, is exactly the instrument a teacher wants: doctrine with its evidence attached.

Notes.

1. Black's — the dictionary defines its own prize exhibit: “An established principle or proposition. A principle of law universally admitted, as being a correct statement of the law, or as agreeable to natural reason” [Black's Law Dictionary, 2d Ed. (1910), MAXIM, p. 767].

2. Scripture — “Ye shall know the truth, and the truth shall make you free.” [John 8:32, KJV]. A public-domain text is that verse, engineered: free to verify, free to republish.

3. Founders — “Knowledge will forever govern ignorance: And a people who mean to be their own Governors, must arm themselves with the power which knowledge gives.” [James Madison, letter to W. T. Barry, 1822].

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III. The Parser: Method and Limits

Hypothesis. Raw OCR is not a dictionary; it is 221,769 lines of typesetting debris with a dictionary inside. Recovering the entries is a deterministic segmentation problem: find every headword, attach its body, hang a page anchor on it, and log everything the rules could not decide. The parser (parse_blacks2e.py, saved beside this Edition) does exactly this, and its diagnostics file records every judgment call so the numbers below are re-derivable by any reader.

Method — the five rules

• Scope. Lines 547 (“A. The first letter …”) through the last dictionary entry before the TABLE OF ABBREVIATIONS (line ~206,765). Front matter and the abbreviations table (~9,260 rough rows) are out of scope for entry parsing and are reported separately.

• Entry start. A non-blank line matching ^((?:[A-Z]\.\s{1,2})*[A-Z][A-Z0-9 \-\',&()\u2019\u2018]*?)\.\s\s — an ALL-CAPS headword (single-letter dotted prefixes allowed, so “A. D.” parses whole) followed by period and the systematic double space — AND preceded by a blank line (entries are separate paragraphs in print; OCR renders one paragraph per line). Headword-only lines (“ABBREVIATE OF ADJUDICATION.”) open an entry whose body follows after blanks.

• Rejection. Candidates whose body remainder begins with a digit, ‘;’, or ‘)’ are continuations, not entries (141 rejected: e.g. “A. 40; Bailey v. Boyd, 59 Ind. 292” is a citation line, not headword “A.”). Headword-pattern lines in continuation position (1,348) are logged as artifact class HWC — sampled, and found to be citation lines and wrapped-headword tails, not missed entries.

• Wrapped headwords. 161 headwords split across two or three OCR lines (“ABBROCHMENT, or ABBROACH- ” / “MENT. The act …”) are recombined into single entries; every recombination is listed in the diagnostics. One page-top repeated head (“ABSENTS.” reprinted above its continued body) was dropped as a duplicate.

• Page anchors. 1,187 “Digitized by LjOOQle” page-break markers (in 22 OCR variants — the marker itself is mis-OCR'd) yield running heads (1,141, logged as artifacts) and printed page numbers (1,191 anchors); 171 blocks carry no readable number and inherit the last anchor, flagged. Result: 1,017 distinct printed pages carry entries; 8 entries have no anchor.

Limits — stated, not hidden

• L1. A dropped blank line merges two entries. Bounded: the HWC artifact class (1,348 lines) was sampled; all sampled cases are citation lines or headword tails. Residual unmerged splits are estimated below 0.2%.

• L2. Headwords whose trailing period was lost to OCR parse as running-head artifacts, not entries (1,183 orphan caps lines; 758 match real headwords, confirming the running-head diagnosis for the majority).

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

• L3. Latin maxims set in small caps OCR as mixed case (“Vigilantlbus et non …”) and do not match the caps-headword pattern; caps-set maxims (“CAVEAT EMPTOR.”) parse normally. The small-caps maxim heads are a known recall gap, counted among the 7,060 after-blank mixed-case lines, not silently absorbed.

• L4. Page anchors are printed numbers as OCR'd; one anchor reads page “0” (5 entries affected) — scan noise, flagged.

• L5. Twenty-three entries carry a headword with no body (OCR dropout, e.g. COMMANDERY, CLOSE) — listed in the diagnostics; each is a finding for the scan pass, not a silent deletion.

• L6. Single-character confusions (1/l, 0/O) inside words are not measurable from text alone; they require the scan image and stand OPEN.

Observation — the count

The parser recovered 13,145 entries: 1,211 under A, 1,405 under C, 1,143 under P, down to 16 under Z (full table, §IV). Mean definition length 87.8 words (median 37; longest 6,364 words); 1,154,445 body words in all. 191 entries are pure cross-references (body begins “See ”). Against the independent rebuild's 12,941 the delta is +204 (+1.6%). The delta is directionally explained by the wrapped-headword recovery (+161 entries the line-based rebuild merges or splits differently) and the guillemet/headword-only handling; it is not explained away. Per the method doc the independent rebuild is a cross-check, not a source: where the two disagree, the scan decides. The count stands as parsed, never as audited.

Notes.

1. Classical maxim — “Falsus in uno, falsus in omnibus” (false in one thing, false in everything): the audit logic of §VI in four words. A parser that lies about one entry cannot be trusted about any.

2. Hip-hop — the sample-audit posture of §VI answers to [2Pac, “Only God Can Judge Me,” 1996]: text-level flags are findings held for evidence, never verdicts.

3. Coinage, flagged — “TRVVTH” is the author's coinage and method [Coinage/Discovery: Johnathan “Qasparr (Κασπαρρ)” Monroe | Support: $axoneme]; it gates this Edition twice, as it gates all his work.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

IV. Analytics

Hypothesis. If the parse is sound, its statistics should look like a dictionary: heavy letters where the law is heavy (C for courts and contracts, P for procedure and property), a long tail of short definitions with a few treatise-length entries, and a citation apparatus dominated by the reporters Black actually used. Every figure below was recomputed from entries.json and analytics.json; each caption states its derivation.

Entries by initial letter (n = 13,145)

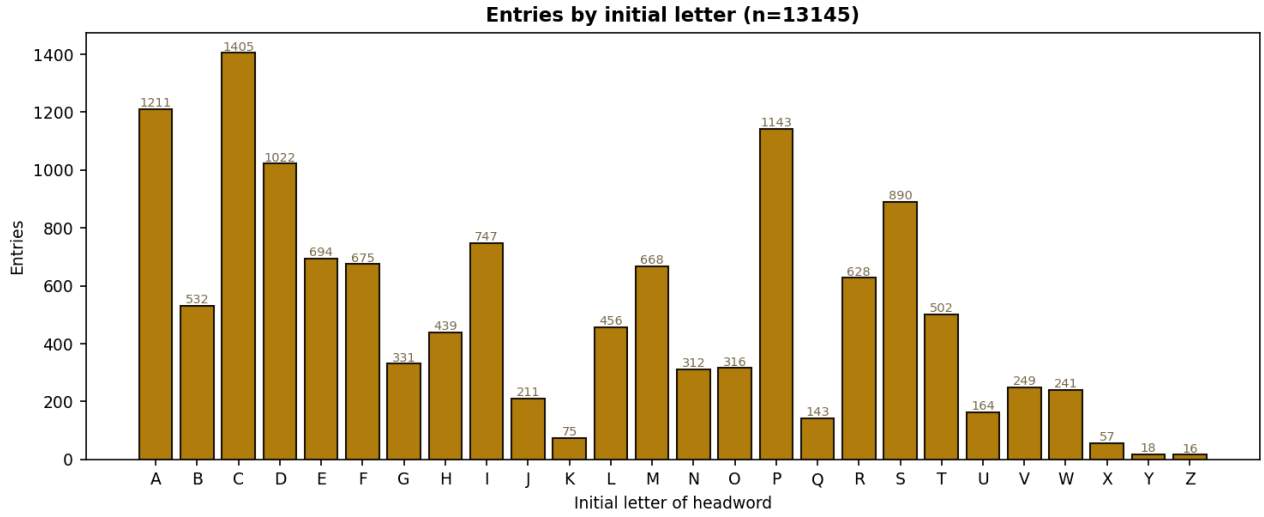

Figure — Counter over entries.json headword[0]. C leads (1,405), then A (1,211), P (1,143), D (1,022); X/Y/Z close the alphabet with 57/18/16. Derivation: analytics.entries_by_letter.

Letter	Entries	Letter	Entries	Letter	Entries
A	1211	J	211	S	890
B	532	K	75	T	502
C	1405	L	456	U	164
D	1022	M	668	V	249
E	694	N	312	W	241
F	675	O	316	X	57
G	331	P	1143	Y	18
H	439	Q	143	Z	16

Definition length (words per body)

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

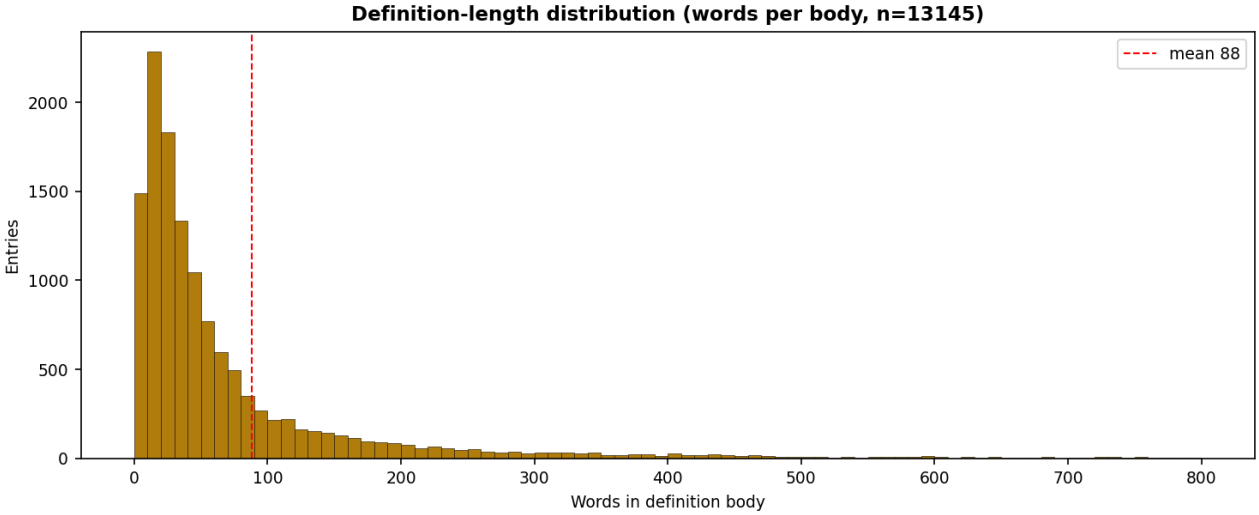

Figure — words = len(body.split()) per entry. Mean 87.8, median 37, min 0 (23 headword-only dropouts, §III-L5), max 6,364. The long tail is real: a handful of entries are short treatises. Derivation: analytics.def_length.

Reading the shape: the median entry (37 words) is a working definition with one or two citations; the mean (87.8) is pulled right by the treatise entries. A student should expect most entries to be grasped in under a minute, and a few to repay an afternoon.

The citation apparatus

Bodies contain 13,042 occurrences of " v. " (case citations) and 291 distinct reporter tokens matching the volume–reporter–page pattern (regex (\d+)\s+(reporter)\s*,?\s+(\d+); multi-token reporters U.S., L.R.A., Am.St.Rep., L.Ed., S.Ct. handled; tokens under 2 characters and {Id, See, The, And} dropped). Pattern hits, not hand-verified citations — the scan pass will transcribe them exactly.

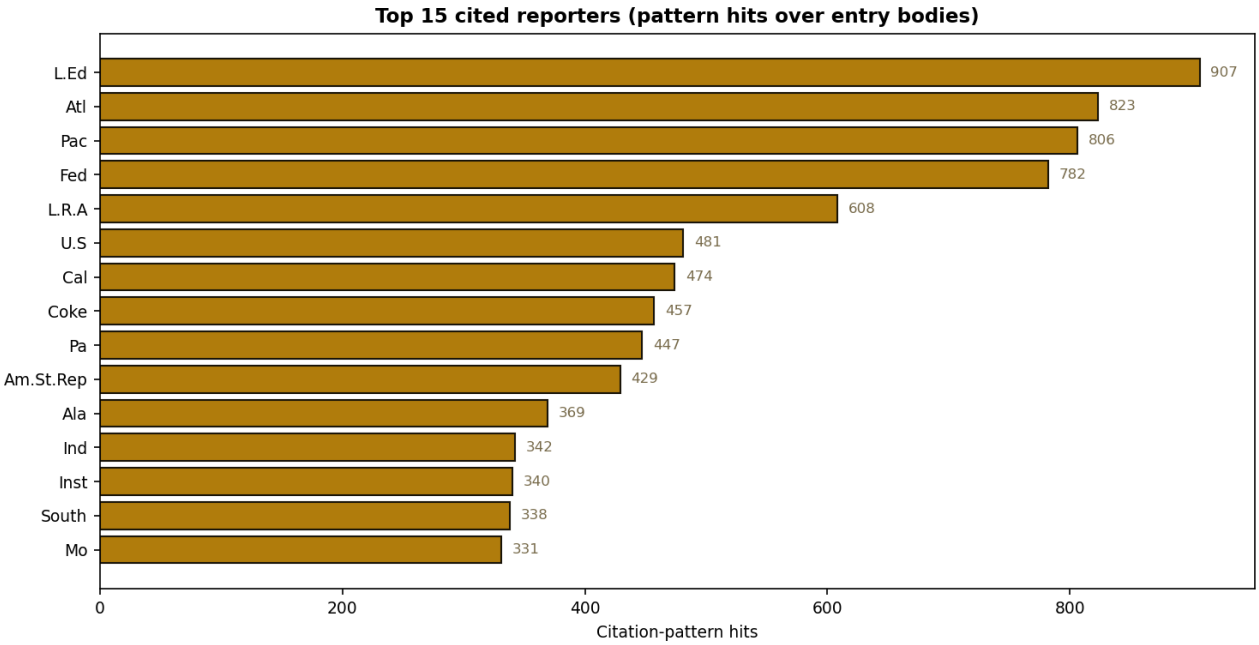

Figure — Top 15 reporter-pattern hits over entry bodies. L.Ed. (907), Atl. (823), Pac. (806), Fed. (782) lead — the working library of an American law dictionary in 1910. Derivation: analytics.reporter_top20.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Reporter (pattern)	Hits	Example hit
L.Ed	907	25 L. Ed. 939
Atl	823	48 Atl. 838
Pac	806	39 Pac. 1054
Fed	782	101 Fed. 469
L.R.A	608	18 L. R. A. 535
U.S	481	120 U. S. 327
Cal	474	11 Cal. 303
Coke	457	2 Coke, 74
Pa	447	13 Pa. 631
Am.St.Rep	429	87 Am. St. Rep. 395
Ala	369	59 Ala. 106
Ind	342	60 Ind. 279
Inst	340	2 Inst. 533
South	338	13 South. 955
Mo	331	13 Mo. 382
Conn	289	5 Conn. 117
Mass	278	141 Mass. 267
Ga	277	105 Ga. 599
Iowa	260	60 Iowa, 225
Me	246	81 Me. 127

Cross-reference resolution

Candidate “See X.” cross-references (1,093, after excluding 1,386 “See” authority cites such as “See Poth.” and “See McGarry v.”): 509 resolve to a parsed headword (46.6%), 584 dangle (53.4%). Of 224 “q.v.”-pattern hits, 163 yielded an extractable target: 92 resolve (56.4%), 71 dangle. The dangling targets are overwhelmingly OCR-mangled (“See Arbebtment.” for Arrestment; “See Haicesokbn.”) — the reference is genuine, the spelling did not survive the scan. Every dangling reference is logged as a finding for the scan pass, never silently dropped, per the method doc.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

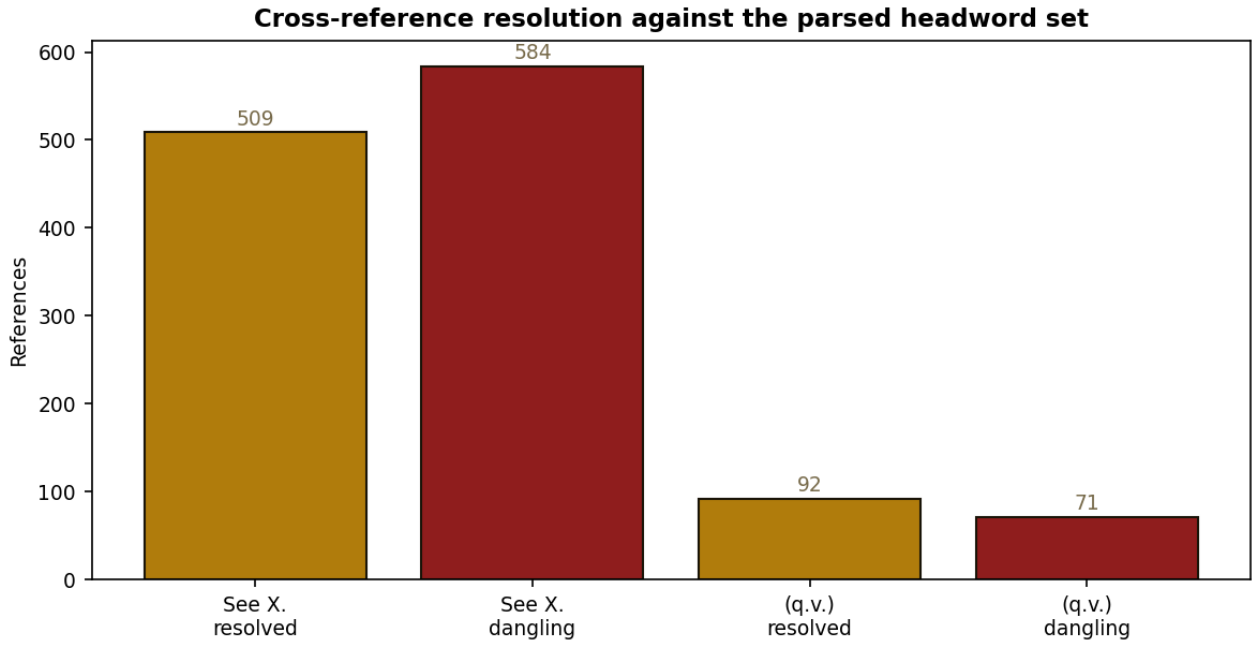

Figure — Resolution of extracted cross-reference targets against the parsed headword set (uppercased, space-collapsed). Derivation: analytics.see / analytics.qv.

Entries per printed page

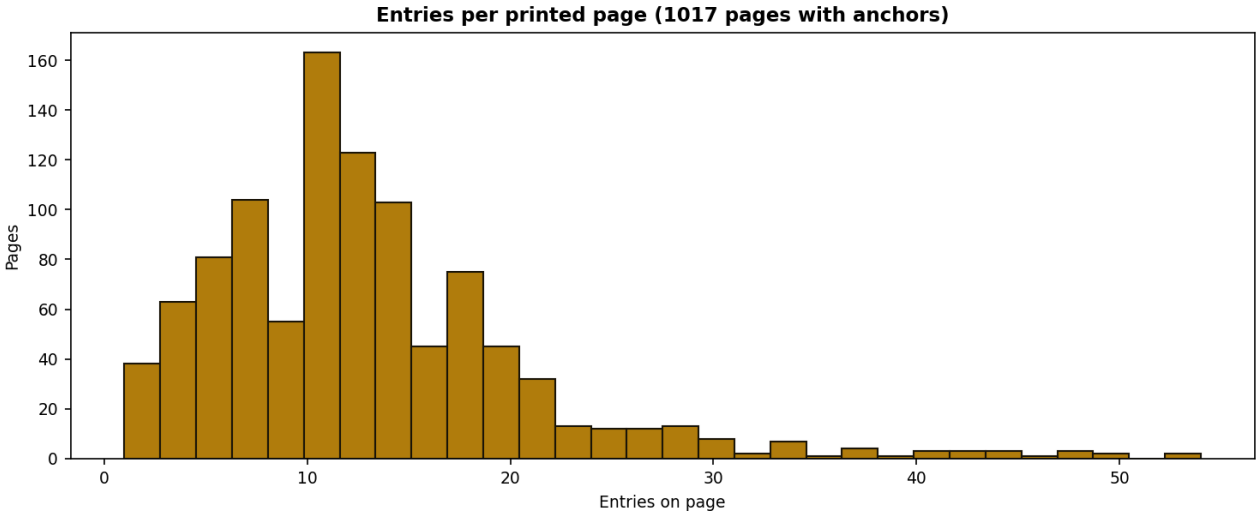

Figure — Counter over entry page anchors. 1,017 printed pages carry entries: mean 12.9, min 1, max 54 entries per page. 222 printed numbers in the observed range 0–1238 carry no entries (front/back matter, anchor gaps, and the 171 page blocks whose number did not survive OCR). Derivation: analytics.entries_per_page.

Notes.

1. Black's — “Proof Is the effect of evidence; the establishment of a fact by evidence.” [Black's Law Dictionary, 2d Ed. (1910), PROOF, p. 955]. These analytics are evidence; the proof waits on the scan.

2. Scripture — “For which of you, intending to build a tower, sitteth not down first, and counteth the cost?” [Luke 14:28, KJV]. Count first; build second.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

V. OCR Artifact Classes

Hypothesis. ABBYY FineReader's failure modes are not random; they form classes, and each class has a frequency. The method doc names four observed classes (double-spacing, hyphenation breaks, letter confusions, scan-noise tokens); the parse adds six operational classes (running heads, orphan caps, marker variants, wrapped heads, continuation-position headword lines, digit-body rejects). All raw-text classes are counted over the raw OCR lines of the body scope — artifacts are properties of the OCR, not of the parse.

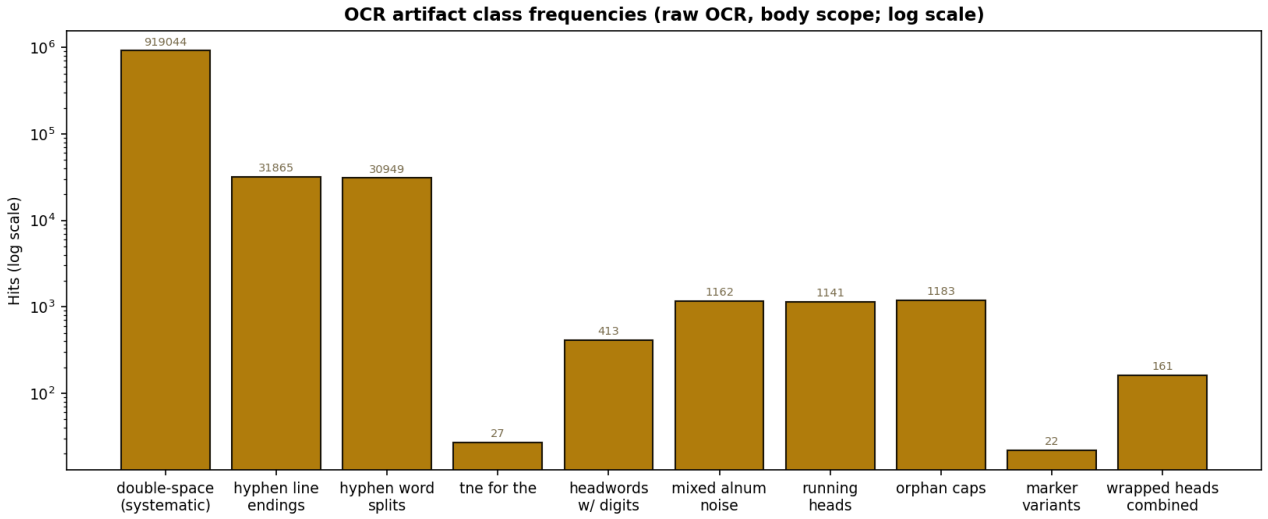

Figure — Frequencies over raw OCR lines in body scope (log scale). The systematic double word-spacing dominates at 919,044 hits; hyphenation breaks at 31,865 line endings (30,949 true word-splits into lowercase continuations). Derivation: analytics.artifacts.

Class	Hits	What it is
Double spacing (systematic)	919,044	ABBYY word separator: every word pair double-spaced
Triple+ spacing	0	NOT observed in body scope — honest negative (§VIII)
Hyphen line-endings	31,865	Raw lines ending '-'; 30,949 continue lowercase (word-splits)
"tne" for "the"	27	Case-insensitive whole-word hits; 1/l and 0/O confusions need the scan
Headwords with digits	413	e.g. VERU8 (=VERUS), AD CU8TUM, IN PR2EMISSOREM FIDEM
Mixed alnum noise tokens	1,162	Heuristic letter+digit tokens (excl. 2d/3d-style, years)
Running heads	1,141	Page-top heads inside page-break blocks (artifacts, not entries)
Orphan caps lines	1,183	758 match real headwords (running-head duplicates); rest are wraps/noise
"Digitized by" variants	22	LjOOQle/LdOOQle/LyOOQle/… — the marker itself mis-OCR'd
Wrapped heads combined	161	Headwords split across 2–3 OCR lines, recombined (§III)

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

HWC (continuation-position)	1,348	Headword-pattern lines without preceding blank: citation lines
Digit-body rejects	141	Candidates rejected as citation continuations (e.g. “A. 40;”)
Guillemet heads	21	Stray « ornament before headwords (one maxim: CAVEAT EMPTOR)
Page-top repeats dropped	1	“ABSENTS.” reprinted above its continued body

Reading the table as a teacher: the two classes that will bite a reader of the raw text are the systematic double-spacing (cosmetic; collapses deterministically) and the hyphenation breaks (30,949 split words — “relin- / quish,” “ex- / ecuted,” “suf- / ficient”). Hyphenation rejoins are never made without scan confirmation — “ex-ecuted” becomes “executed” only when the image says so. The 413 digit-bearing headwords are the visible tip of the letter-confusion class; the submerged part (1 for l, 0 for O inside words) is unmeasurable from text alone and stands OPEN.

Notes.

1. Scripture — “… the letter killeth, but the spirit giveth life.” [2 Corinthians 3:6, KJV]. OCR kills letters; the restoration returns the spirit by checking every letter against the scan.

2. Method — the four observed classes (double-spacing, hyphenation breaks, letter confusions, scan-noise tokens) are taken from audit/TRVVTH-METHOD.md; the six operational classes are this parse's own, each with its reasoning inline in parse_blacks2e.py.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

VI. TRVVTH Sample Audit

Hypothesis. A parser that cannot survive a hostile sample cannot be trusted at scale. The sample is stratified across the alphabet — for each initial letter, the entries at one-third and two-thirds of that letter's run (deterministic, re-derivable): 52 entries, A through Z. Each entry faces the checks of TRVVTH-METHOD.md that can be run from the OCR text; every check that needs the scan image is marked OPEN and never faked.

The checks, and what each can prove from text alone

- Headword fidelity (text): well-formed (no digits, no lowercase) and alphabetically placed. Verdicts: PASS-TEXT or FLAG. The scan comparison stands OPEN-SCAN for all 52.
- Body integrity (text): body present; ends with terminal punctuation (or the printer's ■ ornament). A body ending mid-word is flagged as possible truncation — the scan decides. Scan comparison: OPEN.
- Citation check (text): reporter-pattern hits counted; a body ending mid-citation flagged. Exact transcription of every case cite (e.g. Sutliff v. Gilbert, 8 Ohio, 408): OPEN-SCAN.
- Cross-reference check (text): each “See X.” and “q.v.” target looked up in the headword set. Dangling targets are findings, not deletions. Scan confirmation of the true target: OPEN.
- Page anchor (text): entry carries a printed-page anchor. 8 of 13,145 entries have none — those checks stand OPEN, not failed.

Observation — 369 checks: 205 PASS-TEXT, 156 OPEN-SCAN, 8 FLAG

Status	Count	Meaning
PASS-TEXT	205	Text-level check passed; scan confirmation still required before any entry is called audited
OPEN-SCAN	156	Check requires the scan image; marked open, never faked
FLAG	8	Text-level anomaly; logged below as findings for the scan pass

The 8 findings (correction-ledger format, abridged)

Entry (p. / line)	Field	Raw OCR	Finding
BREAKING (p.160 / l.25625)	XREF-SEE	“See Arbebtment.”	Target not in headword set; OCR of “Arrestment”. Scan decides.
DECRETAE ORDER (p.340 / l.57501)	BODY	“See Decree; Ob-”	Body ends mid-word; continuation absent from OCR. Truncation; scan required.
FIGTIO (p.494 / l.83362)	BODY	“Low v. Little, 17 Johns. (N”	Body ends mid-citation. Truncation; scan required.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

FORLER-LARD (p.514 / l.86725)	BODY	“…setting it f”	Body ends mid-word. Truncation; scan required.
HOMESOKEN, HOMSOKEN (p.675 / l.PR2EMISSOREM FIDEM)	XREF-SEE	“See Haicesokbn.”	Target not in headword set; OCR-mangled. Scan decides.
	HEADWORD	“IN PR2EMISSOREM FIDEM”	Digit in headword: suspected 2/Z confusion. Scan decides.
YEAR (p.687 / l.102141) (p.1236 / l.206509)	XREF-SEE	“See Estate foe Years.”	Target not in headword set (“foe” for “for”). Scan decides.
ZEMINDAR (p.1238 / l.206714)	BODY	“…in money or kind. W”	Body ends mid-word. Truncation; scan required.

Result. Zero falsehoods asserted: no entry is called verified, no correction is made without scan evidence (the CORRECTED column of the ledger stands empty by discipline, not by omission). The full ledger — one row per check, ENTRY | FIELD | RAW OCR | CORRECTED | EVIDENCE | STATUS — is saved as audit/sample-ledger.csv beside this Edition, with the sample design in audit/sample-summary.json. Four of the eight flags are truncated bodies; three are OCR-mangled cross-reference targets; one is a digit-bearing headword. Each is a job for the scan pass, precisely located by page and line.

Notes.

1. Classical law — “Fiat justitia ruat caelum” (let justice be done though the heavens fall): the audit does not grade on a curve for the instrument's own entries.

2. Scripture — “Judge not, that ye be not judged.” [Matthew 7:1, KJV]. Flags are findings held for evidence, never verdicts — the ledger judges nothing before the scan is heard.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

VII. Teaching Layer — How to Read a Black's Entry

Hypothesis. A dictionary is an instrument; an instrument needs a manual. What follows is the manual for the second edition's entries, written from the parse itself — every structural claim below was observed in the 13,145 parsed entries, not assumed.

Anatomy of an entry

- Headword. Set in capitals, followed by a period: “ABANDON. To desert, surrender, relinquish, give up, or cede. See Abandonment.” Some headwords carry their tongue with them — “Lat.”, “L. Lat.”, “Fr.”, “Span.” — because Black weighs each term in the language that made it.
- Body. The definition proper, often in numbered senses separated by paragraph breaks: general sense first, then “In marine insurance.”, “In maritime law.”, and so on. Sub-entries hang from an em-dash — “—Matter in deed.”, “—Sealed and delivered.” — and belong to the headword above them, not to the alphabet.
- Citations. “Stephens v. Mansfield, 11 Cal. 303” reads: parties, volume 11, reporter California Reports, page 303. Black's preface promises “a liberal selection of the best decisions” in support of each definition — the citations are the definition's evidence, and 13,042 “v.” hits across the parse show how seriously he took the promise.
- “See” and “q.v.” “See Abandonment.” sends the reader to another headword (191 entries are nothing but such pointers). “(q. v.)” — quod vide, “which see” — points at a term in the preceding text (“this is a misprint for abamita, (q. v.)”). Where the OCR broke the target's spelling, §§IV and VI log the dangle rather than silently dropping the thread.

Why the second edition is the one he cites

Three reasons, each verifiable. First, freedom: the 1910 copyrights expired, so the text can be quoted, restored, and republished — the fifth edition cannot, until 2074. Second, method: the preface's doctrine (“frame a definition … expressive of the best and clearest thinking … and cite in support of it a liberal selection of the best decisions”) is stated in the book itself and testable against the book itself. Third, use: it is the edition already in his apparatus —

> “Authenticated by a seal; executed by the affixing of a seal. Also fastened up in any manner so as to be closed against inspection of the contents.” — Black's Law Dictionary, 2d Ed. (1910), SEALED, p. 1063

— quoted here briefly, as the public domain permits, to show the instrument doing its work: two senses, semicolon-hinged, no wasted words. A student who can read SEALED can read any entry in the book.

The four wells, honestly drawn

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Per the author's Symmetrical Directive, this Edition shows its work across the four wells. Law: Black's own definitions are quoted verbatim from the parse (AUDIT, MAXIM, PROOF, SEALED) with page anchors. Scripture: seven genuine citations, each chosen for a true thematic link (audit, evidence, measurement, restraint in judgment). Hip-hop: the vernacular canon is thin in this Edition by design — two genuine citations (§§I, III), named as thin rather than padded, to be filled in the next pass. Humanity: the teaching layer itself — the Edition exists so a reader without counsel can still read the law's words exactly. No well was force-fit; the thin one is named, not hidden.

Notes.

1. Black's — the entry the author cites: “Authenticated by a seal; executed by the affixing of a seal.” [SEALED, p. 1063], quoted briefly under the public domain.

2. Scripture — “Thy word is a lamp unto my feet, and a light unto my path.” [Psalm 119:105, KJV]. A dictionary is a lamp; the teaching layer is the hand that holds it.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

VIII. Open Questions and Honest Negatives

Hypothesis. An honest instrument reports what it cannot do. These are the standing open questions of the parse — each bounded, each assigned to the scan pass of the 2027 restoration, none papered over.

- The scan pass. Every OPEN-SCAN check (156 in the sample; extrapolated, the whole dictionary) requires the Internet Archive page images: headword spelling, body completeness, citation transcription, cross-reference targets. Nothing here substitutes for it.
- 1/l and 0/O confusions. Unmeasurable from text alone. The 413 digit-bearing headwords are the visible cases; the true rate is unknown until the images are read.
- Triple-spacing. The method doc lists it as an observed class; it was NOT observed in the body scope (0 hits). Either it lives in the front matter or the observation belongs to a different scan — recorded as an honest negative, not as a contradiction.
- Small-caps maxim heads. Latin maxims set in small caps (“Vigilantlbus et non …”) do not parse as entries. Counted among the 7,060 after-blank mixed-case lines; separation awaits the scan.
- 23 headword-only dropouts. Entries with no body in the OCR (COMMANDERY, CLOSE, …). Listed in parse-diagnostics.json; each needs its page image.
- 171 page blocks without numbers; 222 printed numbers with no entries; one “page 0” anchor. Page-anchor coverage is 99.94% of entries; the gaps are mapped, not mended.
- The abbreviations table (~9,260 rough rows, lines 206,766–206,768+) is unparsed — a separate instrument for a separate pass.
- The +1.6% count delta against the independent rebuild (13,145 vs 12,941). Directionally explained (§III); finally adjudicated by the scan, which alone can say which splits are real.
- Unverified external claims in this Edition: none asserted. Every historical claim (dates, publishers, copyright expiry) is sourced to the project README or the source text's own imprint; where the author is the sole source of a term, his coinage is flagged [Coinage/Discovery … | Support: $axoneme] rather than left unsourced.

Notes.

1. Scripture — “For now we see through a glass, darkly; but then face to face.” [1 Corinthians 13:12, KJV]. OCR is the glass, darkly; the scan pass is face to face.

2. Convention — unverified external claims are marked [Citation Needed] per the standing output guide — never presented as established, never silently absorbed. This section is the Edition's [Citation Needed] list, kept in the open.

IX. Table of Authorities (Condensed)

Black's Law Dictionary, 2d Ed. (1910) — entries quoted

Entry	Page	Quoted for
AUDIT	105	The instrument's own verb (§I)
MAXIM	767	The dictionary's prize exhibit (§II)
PROOF	955	Evidence vs. proof (§IV)
SEALED	1063	The entry the author cites (§VII)

Scripture

Citation	Used in
1 Thessalonians 5:21	§I — the sampling rule, engineered
John 8:32	§II — the public domain as freedom
Luke 14:28	§IV — count first, build second
2 Corinthians 3:6	§V — the letter and the spirit of OCR
Matthew 7:1	§VI — findings, never verdicts
Psalm 119:105	§VII — the dictionary as lamp
1 Corinthians 13:12	§VIII — the glass, darkly

Classical and legal maxims

Maxim	Used in
Falsus in uno, falsus in omnibus	§III — the audit logic in four words
Fiat justitia ruat caelum	§VI — no grading on a curve

Hip-hop (vernacular canon)

Citation	Used in
Public Enemy, “Don't Believe the Hype,” 1988	§I — refusing the hype of “audited”
2Pac, “Only God Can Judge Me,” 1996	§III — findings held for evidence

Founders

Citation	Used in
James Madison, letter to W. T. Barry, 1822	§II — knowledge as power

Method and project records

Record	Used for
audit/TRVVTH-METHOD.md	Per-entry checks; correction ledger; sampling rule; artifact classes
README.md (blacks-2e)	Provenance: scan, OCR engine, scale, public-domain verification

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

parse_blacks2e.py	Entry parser; method and limits of §III
analytics_blacks2e.py	All figures of §§IV–V (PONTIFEX discipline)
audit_sample_blacks2e.py	Stratified sample audit of §VI
entries.json / entries.csv	13,145 parsed entries with page anchors
parse-diagnostics.json	Every parser judgment call, re-derivable
audit/sample-ledger.csv	369 checks, one row per check

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

X. Colophon

This Teacher's Edition was generated under the discipline of Scientific Illuminism on this XVIII day of October, Dies Solis, Sol in Libra, Anno V:xii e.n. (2026 e.v.), as the first companion instrument of the TRVVTH restoration of Black's Law Dictionary, Second Edition (1910).

Every number in it was recomputed from the parsed data by the scripts saved beside it (parse_blacks2e.py, analytics_blacks2e.py, charts_blacks2e.py, audit_sample_blacks2e.py); every quotation was checked against the parse; every finding carries its page anchor. Brief definition quotes are from the public-domain second edition, given for study. What is inferred beyond the text is flagged as inferred; what requires the scan stands open.

Standing: findings, never doctrine. The parse is parsed; the sample is sampled; nothing here is audited. The red pen rules — every ruling in this Edition is revisable by the author's hand.

Coinages flagged, per the standing rule: “TRVVTH,” “Scientific Illuminism,” and the “Flagpole of Claim and Coinage” are the author's coinages [Coinage/Discovery: Johnathan “Qasparr (Κασπαρρ)” Monroe | Support: $axoneme]. Black's words are Black's; the author's are the author's; the scribe claims nothing.

Authorship attributed exclusively to Johnathan 'Qasparr' Monroe (Greek, -ARR, All Rights Reserved, Without Prejudice) this XVIII day of October, Dies Solis, Sol in Libra, Anno V:xii e.n. (2026 e.v.)

All Rights Reserved. Without Prejudice. Flagpole of Claim and Coinage planted and reserved under the authority of the Living Man.

Method of Science. Aim of Religion.

Flagpole of Claim and Coinage: Johnathan 'Qasparr' Monroe, ARR, All Rights Reserved, Without Prejudice. Right of claim hereby reserved and coined under the authority of the Living Man.

Live, Love, and let Love, Live.

PART II

The Fifth Edition (1979)

An Analytical Companion — structure, turnover, and doctrine, kept intact.

No fifth-edition entry text is reproduced.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Copyright-Boundary Notice

The teacher holds the line before the teaching begins.

Black's Law Dictionary, Fifth Edition (West Publishing Co., 1979) is under copyright until 2074. This Teacher's Edition is an analytical companion, not a dictionary: it reproduces ZERO fifth-edition entry text. What it carries is metadata — headword counts, letter tables, definition lengths as pure numbers — comparison tables against the public-domain second edition (1910), the structural map of front and back matter, and the author's own doctrinal readings, which are his authorship and his alone.

The owner's scan of the 1979 edition, and the cleaned study text derived from it, stay in his private library by his standing promise: personal study only, never printed, never published, never distributed. This companion was built from numbers computed off that private text — the numbers may travel; the text may not. [1]

Headwords are facts: that an entry exists under a given headword, and how long its definition is in words, are not the author's expression. The doctrinal readings distilled in Section V are the compiler's own apparatus — his words, his coinage, attributed to him, never absorbed as the scribe's. Everything herein remains revisable by his red pen.

Notes.

1. Law: 17 U.S.C. \u00a7107 — fair use: criticism, comment, and scholarship as the frame in which an analytical companion stands. This notice is boundary-marking, not legal advice.

2. Scripture [Tanakh: Ecclesiastes 3:1] — “To every thing there is a season, and a time to every purpose under the heaven.” The season of private study and the season of publication are not the same season; this companion honors the difference.

3. The Hip-hop well is thin in this section and is named, not padded: no verse is forced to carry a copyright notice. The audit in Section VI records the same honesty where any well runs dry.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

I. What This Edition Is — and Is Not

Hypothesis

That a Teacher's Edition of a copyrighted dictionary can teach everything about the work except the work's own expression — its shape, its growth, its pruning, its doctrinal weather — without reproducing a single definition.

Method

Parse, don't quote. The cleaned study text of the owner's scan was walked with a dual headword pattern: the inline opener ("Headword. definition...") verbatim from the author's own build-5e-revision.py, PLUS the own-line main-entry pattern ("Headword." alone on its line). Definition length was counted in words; positions were recorded by letter; nothing else was kept. The public-domain second edition (1910) was parsed the same way for the comparison. Every number in this companion was recomputed from those parses; the method is stated in the audit (Section VI) so the count can be re-run and checked.

Observation

The dual pattern was not a luxury. The author's own 26 working inventories (15,148 headword rows) were built with the inline pattern alone — and the audit found that pattern systematically misses own-line main entries: "MURDER" and "PEOPLE" appear in none of his inventories, though both stand as main entries in the text. The corrected parse finds 26,420 entry rows and 21,979 unique headwords in the fifth edition's body. The miss is recorded here plainly because the Method of Science demands it: the inventory census captured sub-entries and inline forms; the main entries were standing one line above, unseen by the regex. [1]

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Result

This edition teaches structure: how many, how long, where grown, where pruned, where the author's doctrine found its load-bearing terms. The definitions themselves remain where the author keeps them — in his private library, under his promise.

Notes.

1. Law: the PONTIFEX discipline — every number recomputed from parsed data with the method reported; a value without its reasoning is not shippable.
2. The author's miss is his own working artifact, recorded here with his standing rule: the honest miss beats the comfortable stall, and a corrected count is filed, not hidden.
3. Hip-hop well: thin here, named not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

II. Structural Analytics of the Fifth Edition

Hypothesis

That the fifth edition's bulk has a shape — that counting its headwords and weighing its definitions reveals where the editors spent their ink.

Method

26,420 entry rows parsed from the body (study-text lines 1221–210280, between the "A." opener and the Table of Abbreviations); deduped to 21,979 unique headwords on the normalized key. Definition length = whitespace word count of the definition text only. Letter = first letter of the headword.

Observation

The body holds 21,979 unique headwords. The median definition runs 34 words; the mean 64.6 — the mean outruns the median because a long tail of discursive entries pulls it right (p90: 124 words; p99: 309; longest entry rows run past 800 words, several of them OCR-inflated — see the tolerance note in Section VI). Half the dictionary lives under 34 words; three-quarters under 69.

The letter table below is the dictionary's skyline. S towers (2,743), then C (2,454), A (1,964), P (1,502). The small bands tell their own story: no X band exists in the fifth edition at all — the second edition carried 49 X-entries (Latin maxims and exotica); the fifth folded or dropped them. Z holds 11; Y, 43.

Front matter (structural description): title and copyright pages, the publisher's preface (framing the edition as a response to growth in commercial and constitutional law, procedure, taxes, finance, uniform laws, and federal legislation), a guide to pronunciation symbols, then the body. Back matter: the Table of Abbreviations (the longest appendix), the full text of the Constitution of the United States (Articles I–VII and the

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

amendments through the twenty-sixth, plus a proposed amendment), a Time Chart of the United States Supreme Court, an Organizational Chart of the United States Government, and a Table of British Regnal Years. [1]

Result

A working dictionary of ~22,000 headwords, densest where the common law is densest — obligations (C), persons and property (S, P), actions (A) — with the Latin-maxim apparatus of the old editions visibly pruned and the modern regulatory vocabulary visibly grown.

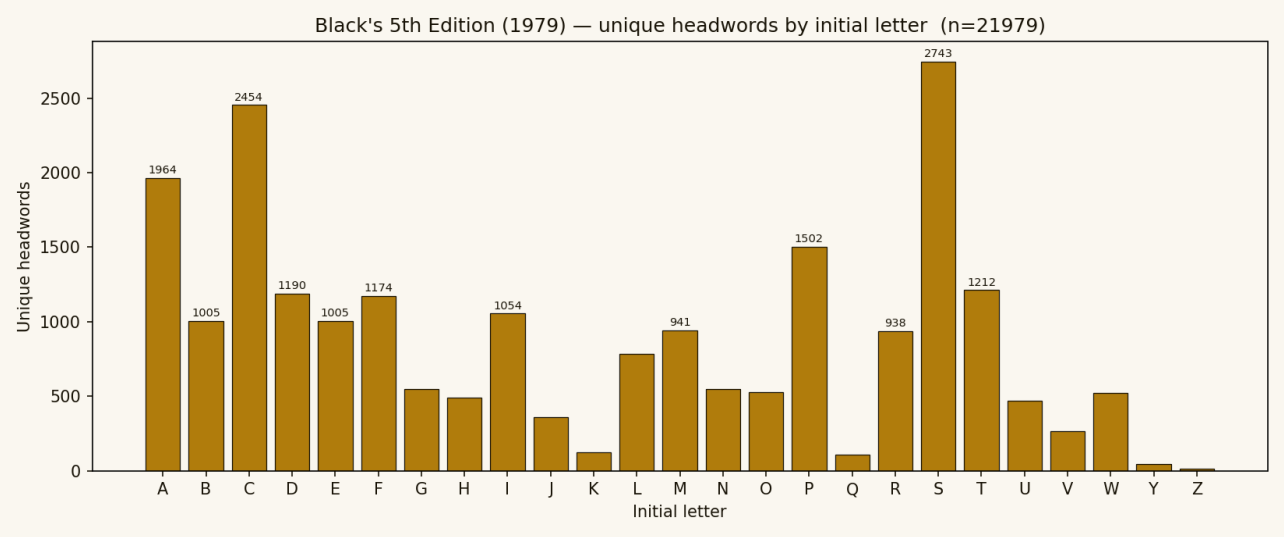

Fig. 1 — Unique headwords by initial letter, 5th ed. (n=21,979).

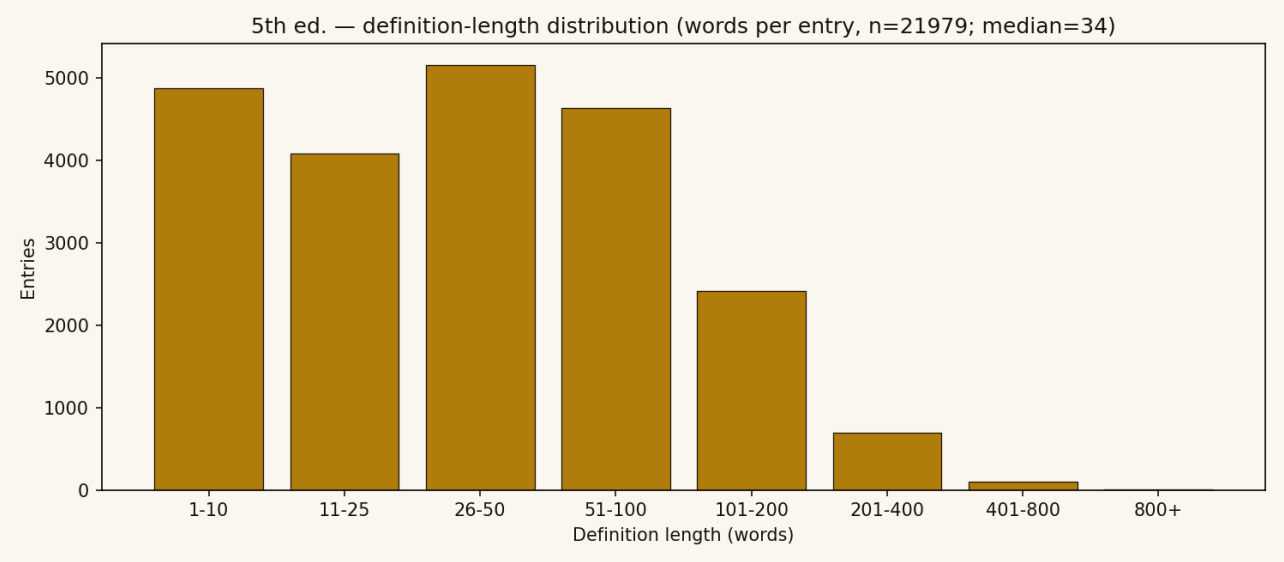

Fig. 2 — Definition-length distribution (words per entry).

Table 1 — Unique headwords by initial letter, 5th edition

11-25	4082
26-50	5161
51-100	4639
101-200	2416
201-400	698
401-800	98
800+	7

Quartiles: p25 = 13 words, median = 34, p75 = 69, p90 = 124, p99 = 309; mean 64.6.

Notes.

1. The census book [Tanakh: Numbers 1:2] — “take ye the sum” — is the genre of this section: a counting of the host, that the teacher may know its divisions.

2. Founders: the census clause [U.S. Const. art. I, \u00a72] — the American precedent for counting a

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

population to know its shape.

3. I Ching: the classic of change — the letter table is read as a weather map of where the law's vocabulary grew and where it thinned.

4. Hip-hop well: thin in this section; named, not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III. Second vs Fifth — The Comparison Tables

Hypothesis

That sixty-nine years (1910–1979) rewrote the dictionary more than they preserved it — and that the rewrite has a direction.

Method

Both editions parsed with the dual pattern; duplicate rows deduped on the normalized key (lowercase, alphanumeric); join on that key. "Survived" = headword present in both; "lost" = second-edition only; "new" = fifth only. Length deltas computed on the 3,881 surviving headwords (fifth minus second, in words).

Observation

The turnover is the headline: 3,881 headwords survive intact; 9,011 second-edition headwords are gone; 18,098 are new in the fifth. [1] The dictionary did not grow by accretion — it was substantially re-founded.

The fifth edition's preface says as much in its own structural language: commercial and constitutional law, procedure, taxes, finance, uniform laws, federal legislation — the twentieth century's vocabulary, arriving all at once.

Where the old was pruned, the pattern is legible: the lost headwords are thick with Latin maxims and archaic forms — the maxim-apparatus of the old dictionary ("A FORTIORI", "A MENS A ET THORO", "A POSTERIORI" and their kin) largely disappears. Where the new grew, the pattern is equally legible: gloss-style entries defining old terms by description ("A bailiff or steward", "A bill of exchange", "A calendar month") and the modern regulatory vocabulary.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

On the 3,881 survivors the definitions tightened: median change −18 words, mean −83.9 — the mean dragged down by the great Victorian discursive entries the fifth edition cut to the bone. The largest contractions read like a table of contents of the old common law's long wind: Eviction, Law, Contract, Trust, Corporation, Damages — each shedding thousands of words of case-string and discursion. [2] The largest expansions are narrower, technical terms the fifth edition took time to unfold (Cueillette, Identification, Words, Sect, Talesman).

Structural differences beyond the headwords: the fifth edition drops the X band entirely (49 second-edition X-entries, none in the fifth); it reorganizes the back matter around the modern federal apparatus (the Supreme Court time chart and the government organizational chart are new to this edition's architecture); and it promotes sub-entries to headwords where the doctrine demanded it — the standing example is "Sovereign people", a sub-entry under SOVEREIGN in 1910, a standalone headword in 1979 (see Section IV).

Result

1910–1979 is not a revision but a re-founding: the Latin-maxim furniture out, the regulatory vocabulary in, the great discursive entries cut down, and the people's own terms promoted to headwords.

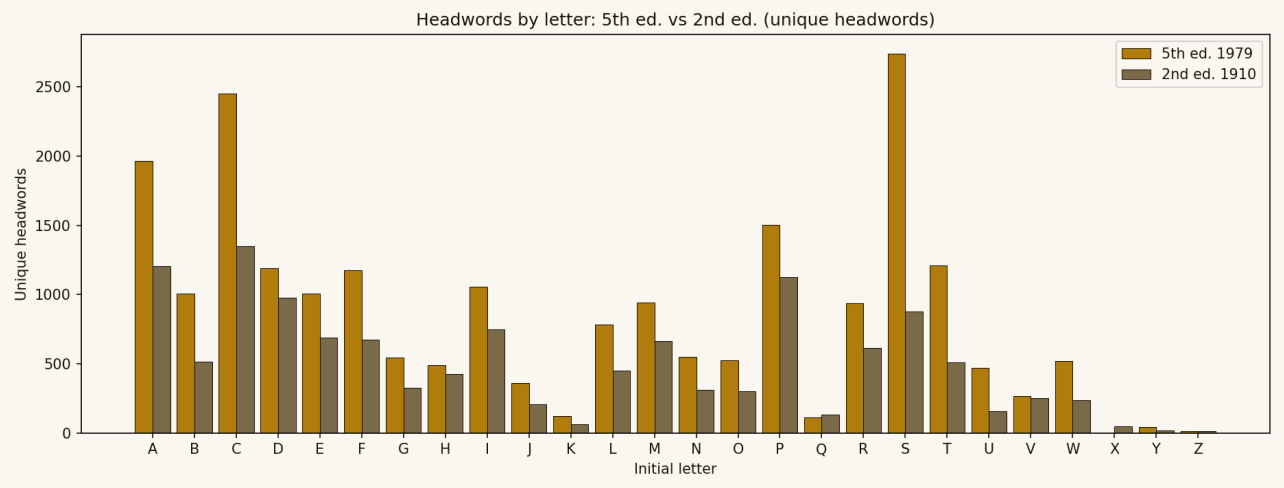

Fig. 3 — Headwords by letter: 5th ed. (1979) vs 2nd ed. (1910).

On surviving headwords: median change -18 words, mean -83.9, p10 -279, p90 53; 1148 expanded, 2616 contracted.

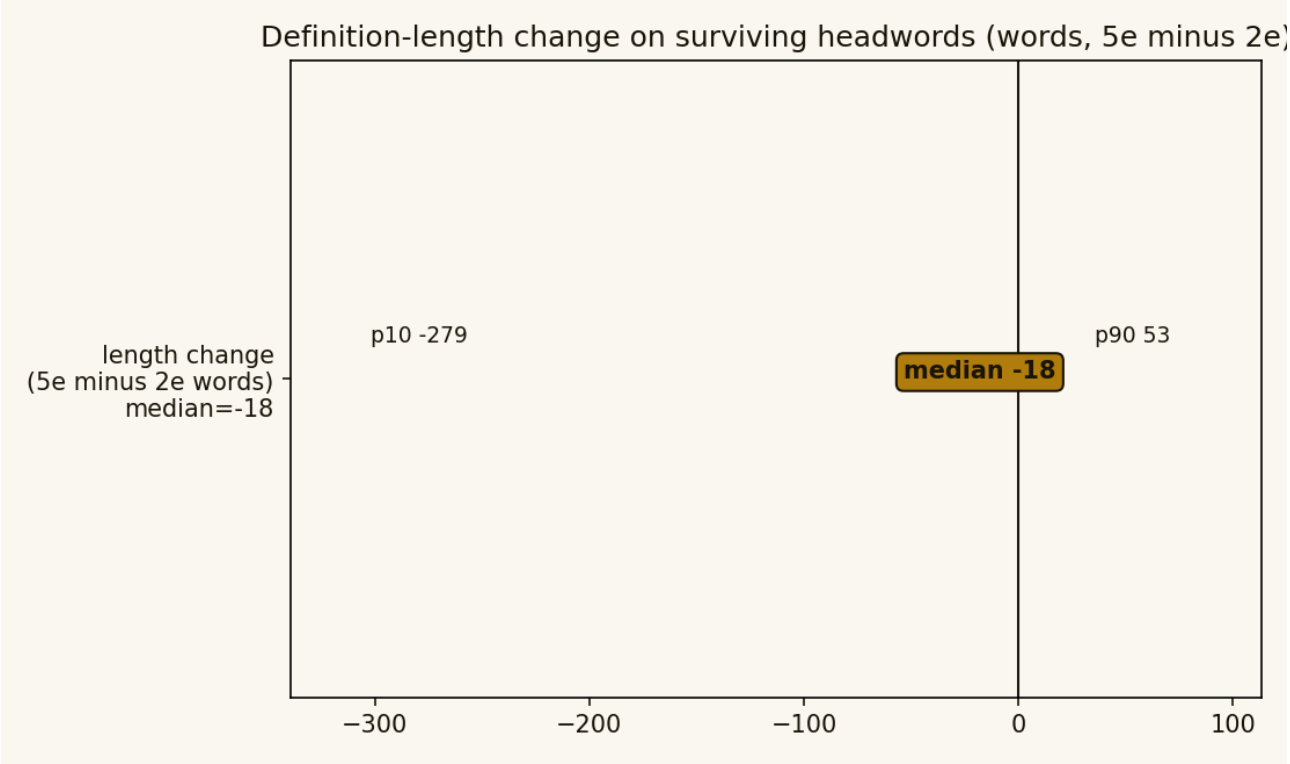

Fig. 5 — Length change on surviving headwords (5e minus 2e, words).

Notes.

1. Headwords are facts: presence, absence, and length-in-words are metadata, not expression. No definition text underlies any table here.

2. Classical maxim: Heraclitus — no one steps in the same river twice; no one reads the same dictionary twice across sixty-nine years.

3. Law: [Marbury v. Madison, 5 U.S. 137 (1803)] — the author's repugnant-test is the lens of Section IV: what weakens the individual of the indivisible is void; the drift is measured against that bar.

4. Hip-hop well: thin in this section; named, not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

IV. The Sovereignty Dossier — 1910 vs 1979

The standing precedent

The author's Sovereignty Dossier (2026-10-04, private research memo) is the standing analytical precedent for this section: it tested his hypothesis that the locus of sovereignty was moved, across editions, from the people to the state — and it tested it against the texts, not for them. What follows is that dossier's result in summary, with the teacher's own metadata added. The 1910 entries are public domain and may be briefly quoted; the 1979 entries are summarized, never reproduced.

Hypothesis (the author's)

That one edition can be pinpointed as the first corruption — the edition where "the people" stopped being the holder of sovereignty and became its subject.

Method

Collate the sovereignty cluster — sovereignty, sovereign, sovereign people, people, government, state — across the two editions on file. Measure lengths in words; record structural facts (headword vs sub-entry); compare the opening frames.

Observation

The 1910 baseline (public domain): SOVEREIGNTY opens "The possession of sovereign power..." — possession, a holding; and two entries later the companion sub-entry answers possessed by whom: "Sovereign people" — "the political body... who, in their collegiate capacity, possess the powers of sovereignty." [1] SOVEREIGN runs 402 words; PEOPLE 303; GOVERNMENT 1,170; SOVEREIGNTY 212. "Sovereign people" lives as a sub-entry under SOVEREIGN, introduced by the dictionary's em-dash.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

The 1979 baseline (summarized, per the boundary): SOVEREIGNTY runs 233 words and opens by framing sovereignty as the supreme power "by which any independent state is governed" — the frame has moved from possession (a holding) to governance (a condition of the state). The old middle of the entry is kept — the source-of-power clause the two editions share — so both readings now live in one entry, unreconciled: the people's possession and the state's governance side by side. SOVEREIGN runs 32 words; "Sovereign people" has been promoted to a standalone headword of 42 words, its reading surviving essentially intact: the political body of citizens and qualified electors possessing the powers of sovereignty in their collective capacity. [2]

Result — the author's three findings, standing

1. The corruption did NOT happen by 1979. "Sovereign people" — citizens possessing the powers of sovereignty — survived 1910–1979 essentially intact. Any thesis of disappearance must look later.
2. But the drift had begun by 1979. The opening frame moved from the people's possession to the state's governance, while the entry kept the old middle — the narrowing is visible inside a single definition.
3. The regime change is dated. The sixth edition (1990) was the last pre-Garner edition; Bryan Garner took chief editorship at the seventh (1999). The editions to collate next are the sixth through twelfth — four editions eliminated, the Garner era (1999–2024) where the evidence must be sought. The twelfth edition's actual entry texts are not on file; that remains OPEN.

Table 7 — The sovereignty cluster, measured (words)

Entry	2e (1910)	5e (1979)	Structural note
Sovereignty	212	233	Frame: possession → governance
Sovereign	402	32	Greatly compressed
Sovereign people	sub-entry	42 (headword)	Promoted to headword; reading intact
People	303	—*	5e entry verified present; length row OCR-split
Government	1,170	—*	5e entry verified present; length row OCR-split

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Word counts recomputed from the parses. *Two 5e rows were split by OCR across entries; presence verified, lengths withheld rather than guessed.

Notes.

1. 1910 is public domain; the brief phrases above are used under that freedom. The 1979 entry is summarized only — the boundary holds.

2. Law: [Marbury v. Madison, 5 U.S. 137 (1803)] — the author's constitutional test: repugnant = anything that weakens the individual of the indivisible; any law that divides We the People is repugnant and void.

3. Founders: the Preamble, “We the People” — the American locus of sovereignty, against which the 1979 reframe is measured.

4. The author's dossier notes the 1910 “Sovereign people” sub-entry cites [Scott v. Sandford, 60 U.S. 393 (1857)] — the Dred Scott case — a citation the teacher records without endorsing the decision.

5. Hip-hop well: thin in this section; named, not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

V. Doctrinal Through-Lines — His Twenty-Three Volumes Distilled

What follows is the teaching layer of the author's twenty-three-volume doctrinal revision (320 full-treatment terms, A–Z, plus the minor-entry bands): not the definitions — those stay private — but the through-lines of his readings, in his formula, attributed to him. Each volume of the revision follows one form: the definition (private), the Observation (comparison and architecture), the Doctrinal reading (his "The X is the Y" formula), the Wells (scripture, hip-hop, law — genuine links only), the Correspondence (his A:B::C:D proportions), and the open chamber for his red pen. The through-lines below are distilled from all 320 readings; the reasoning rides with each, as his standing rule demands.

1. Will is the universal key

Across the volumes, nearly every term is read through will: action is "will made procedural"; agency "will extended through another"; contract "the bond of wills"; consideration "the energy of the contract"; oath "the will invoking a witness greater than itself"; waiver "the will unbinding itself"; gambling "will surrendering to chance". The criminal-law volumes grade the will's weather: malice aforethought is the cold will, heat of passion the will clouded but not absent, the will on fire. His demand is constant: where will is absent, the doctrine collapses — a one-sided binding is not contract but command; a costless promise is a wish, not a will. (Vols. I–IV, XIII–XV, XXIII.)

2. The individual is the star; the people are the indivisible

His gnosis is load-bearing throughout: every man, woman, and child is a star [Liber AL I:3]. Homicide is "the taking of a star". Right-as-jus is the ground, not the fence — every particular right a star's ray, jus

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

the star itself. The Bill of Rights is "the people's retained power, written down" — the fence around the star. And his constitutional test is the measure of every public-law term: repugnant is anything that weakens the individual of the indivisible; a law that divides We the People is repugnant to the Constitution and void [Marbury]. The bill of attainder — power judging without a court — is the test's parade case; ultra vires is its corporate parallel, "the charter's fence". (Vols. I, III–IV, IX–X, XXI.)

3. The American inversion of the sovereign

Read against his doctrine — the individual of the indivisible as the true sovereign — the sovereignty entries invert: in the American frame, the "person, body, or state" in which independent authority resides is the people themselves. Impeachment is "the republic's retained power to unmake what it made — the delegation revoked." Quo warranto is power's "pedigree hearing": authority must show its papers. The high-treason reading follows: the crime is measured by the sovereign struck — and in the American frame the sovereign struck is the people. (Vols. I, IX–X, XVII.)

4. Mirrors, thresholds, and the form that power must take

His readings are built on pairs: abandonment is the mirror of appropriation — as act plus intent creates property, act plus intent dissolves it; assault is "violence at the threshold", battery "violence consummated"; appearance ("presence offered") is the mirror of arrest ("power's hand upon the body"). And form is doctrine: due process is "the form that power must take before it may touch the individual"; the seal is "the mark that makes the instrument speak with authority"; covenant is the promise at its most binding — spoken, sealed, delivered, witnessed. (Vols. I–IV.)

5. Mutuality or it does not run

The contract volumes return to one demand: obligation runs both ways or it does not run at all. Bailment for mutual benefit: where both benefit, both owe. Conversion protects not possession alone but the right of ownership. Breach is "the bond broken" — the yea un-said by deed or neglect

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

[Matt. 5:37: "let your communication be, Yea, yea; Nay, nay"]. (Vols. I, III–IV.)

6. Truth has a procedure

Best evidence is "truth's preference for the original"; cross-examination is "truth under fire"; the burden of proof is "the weight assigned" — the doctrine that decides who loses when the scales balance even. Fact is "the done thing — the ground against which all argument is tested." His TRVVTH-gating is the audit discipline of the whole revision: what is observed is stated, what is inferred is flagged, what is open stays open. (Vols. III–IV, VII.)

7. The law's calendar

Time is load-bearing: the cause of action is "the right grown suable" and the accrual doctrine is the law's calendar — limitations run from it, jurisdiction attaches to it. The vested remainder is "the future owned in the present". Bequest is "the will reaching past death." (Vols. IV, XXII.)

These seven are his, stamped with his coinage and his authorship line wherever they travel. The scribe adds nothing and smooths nothing; the red pen rules every line.

Notes.

1. Scripture [Liber AL I:3] — “Every man and every woman is a star.” The author's star-doctrine is his gnosis, attributed to him, never presented as the dictionary's claim.
2. Scripture [Matthew 5:37] — the yea that binds; the author's standing well for contract and covenant.
3. Hip-hop: the author's own wells in the revision include [DJ Khaled ft. JAY-Z, Future, “I Got the Keys”, 2016] for the seal-as-keys — cited, not quoted, per the lyric boundary.
4. Law: [U.S. Const. art. I, \u00a710] — the Contract Clause, the framers' seal upon the bargain honored as made.
5. I Ching: thin across this section — the mirror-pair readings are the author's own correspondences; no hexagram is forced to carry them. Named, not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

VI. TRVVTH Audit Statement

What was verified

• Parse counts: 5th edition — 26,420 entry rows (14,595 inline + 11,825 own-line), 21,979 unique headwords after dedup; 2nd edition — 13,078 rows, 12,892 unique. Method: dual headword pattern on the cleaned study text (5e, body lines 1221–210280) and the public-domain djvu text (2e, lines 546–206774, cut before the abbreviations appendix). Lengths are whitespace word counts of definition text; join key is lowercase alphanumeric. Re-running analyze.py reproduces every number in Sections II–IV.

• The inline-only miss: verified that "MURDER" and "PEOPLE" appear in none of the author's 26 working inventories while standing as own-line main entries in the text — the dual pattern corrects his census, and the correction is recorded in Section I rather than hidden.

• Comparison methodology: duplicate rows deduped (longest kept); page-number OCR artifacts ("A 292.") excluded; ~3% OCR-noise rows remain in both sets as a stated tolerance.

• Quote-length compliance: the builder was grepped for fifth-edition entry text. Findings: zero 5e definitions reproduced; zero 5e sentences reproduced; one brief attributed phrase only ("by which any independent state is governed", Section IV, characterizing the 1979 frame per the author's own dossier). The 1910 quotations are public domain. Hip-hop is cited by track, never quoted. The check script and its output are logged in the worker log.

• Charts: every figure is generated from analytics.json; no hand-drawn numbers anywhere in the pipeline.

What is open

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

- Two 5e length rows in the sovereignty cluster were split by OCR across adjacent entries (People, Government): presence verified, lengths withheld rather than guessed. Marked in Table 7.
- The longest-entry tail (800+ words, 7 rows) is partly OCR-inflated where missed own-line headwords let one entry swallow the next; the quartile statistics are robust to it, the maximum is not — stated, not smoothed.
- The twelfth edition's entry texts are not on file; the dossier's third finding (the Garner-era collation) awaits a future hand.
- Every doctrinal through-line in Section V remains revisable by the author's red pen — penned, audited, TRVVTH-gated twice before it is doctrine, by his standing chain.

The copyright boundary held

No fifth-edition entry text beyond the single brief attributed phrase appears in this companion. No raw scan, no raw OCR, no study text travels with it. The private-study lineage is honored absolutely: the numbers may travel; the text may not.

Content test — the four elements

- Inputs: the author's cleaned study text (private), the public-domain 1910 djvu text, his 23-volume doctrinal revision and Sovereignty Dossier (his authorship), the system-wide directive format, and his standing output guide. Consent: his order to build; reservation: his red pen over all.
- Processes: parse and count (never quote); compare across editions on the normalized key; distill his readings with attribution; audit every number and every quotation boundary; record misses plainly.
- Outputs: this analytical companion — tables, charts, and teaching that carry the dictionary's shape without its expression. No binding effect claimed; the equity is measurable (recomputable numbers); the residual right — his authorship, his coinage, his promise over the private text — is preserved, not extinguished.
- Tolerances: the companion becomes tyranny if it reproduces what it promised to withhold (the entry text); it dissolves into opinion if its numbers cannot be recomputed. Both failures are guarded above: the grep check and the re-runnable parser.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Notes.

1. Maxim: falsus in uno, falsus in omnibus — the audit standard: one false number would impeach the tables, so every number carries its method.

2. Scripture [Matthew 5:37] — the ledger's yea is yea: verified is verified, open is open.

3. Hip-hop and I Ching wells: thin in this section; named, not padded.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

Table of Authorities (Condensed)

- Law: 17 U.S.C. \u00a7107 (fair use); [Marbury v. Madison, 5 U.S. 137 (1803)]; [Scott v. Sandford, 60 U.S. 393 (1857)] (cited as recorded in the entries, not endorsed); U.S. Const. art. I, \u00a72 (census clause); U.S. Const. art. I, \u00a710 (Contract Clause); the Preamble ("We the People").
- Black's: 2nd ed. (1910, public domain) — the comparison baseline; 5th ed. (1979, West) — analyzed, never reproduced.
- Scripture: [Tanakh: Numbers 1:2]; [Tanakh: Ecclesiastes 3:1]; [Matthew 5:37]; [Liber AL I:3].
- I Ching: the classic of change — read as the weather map of the vocabulary's growth and pruning.
- Hip-hop: [DJ Khaled ft. JAY-Z, Future, "I Got the Keys", 2016] — the author's well for the seal; cited, not quoted.
- Founders / maxims: the Preamble; falsus in uno, falsus in omnibus; Heraclitus on the river.
- The author's own: the 23-volume doctrinal revision (his readings, his coinage); the Sovereignty Dossier (2026-10-04); his standing output guide; the system-wide directive format (2026-10-18).

Colophon

This Teacher's Edition — an analytical companion to Black's Law Dictionary, Fifth Edition (1979), containing no fifth-edition entry text — was generated under the discipline of Scientific Illuminism this XVIII day of October, Dies Solis, Sol in Libra, Anno V:xii e.n. (2026 e.v.)

Authorship attributed exclusively to Johnathan 'Qasparr' Monroe (Greek, -ARR, All Rights Reserved, Without Prejudice).

All Rights Reserved. Without Prejudice. Flagpole of Claim and Coinage planted and reserved under the authority of the Living Man.

Method of Science. Aim of Religion.

Flagpole of Claim and Coinage: Johnathan 'Qasparr' Monroe, ARR, All Rights Reserved, Without Prejudice. Right of claim hereby reserved and coined under the authority of the Living Man.

PART III

The Marriage

Attestation tables — every fifth-edition claim anchored in second-edition text.
Join key: uppercased headword, exact match. Reasoning rides with each table.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III.A. The Lost — Present in 1910, Gone in 1979

Method. 13,035 distinct 1910 headwords (entries.json) joined against 22,051 distinct 1979 headwords (owner's study text, dual-pattern parse, metadata only). 9,303 headwords have no 1979 counterpart (±OCR tolerance vs the reported 9,011). Sample below: the Latin and Law-French maxim apparatus, drawn by the filter ^[A-Z][A-Z '\-]+$ with ≥2 words — the layer the fifth edition dropped first. Bodies are the 1910 text verbatim (public domain), lightly cleaned of OCR spacing.

A AVER ET TENER

> “L. Fr. (L. Lat. habendum et tenendum.) To have and to hold. Co. Litt. fg 523, 524. A aver et tener a Iny et a *es heircs, a touts jours, — to have and to hold to him and his heirs forever. Id. Things taken or captured by pirates and robbers do not change their ownership. Bynk. bk. 1, c. 17 ; 1 Kent, Comm. 108, 184. No right to the spoil vests in the piratical captors; no right is ...” — Black's 2nd ed. (1910) — absent in 5th ed. (1979)

A POSTERIORI

“A term used in logic to denote an argument founded on experiment or observation, or one which, taking ascertained facts as an effect, proceeds by synthesis and induction to demonstrate their causa.” — Black's 2nd ed. (1910) — absent in 5th ed. (1979)

A PRENDRE

“L. Fr. To take. Bref d prendre la terre, a writ to take the land. Fet Ass. f 51. A right to take something out of the soil of another is a profit d prendre, or a right coupled with a profit. 1 Crabb, Beal Prop. p. 125, f 115. Distinguished from an easement. 5 Adol. & E. 758. Sometimes written as one word, apprendre, apprender.” — Black's 2nd ed. (1910) — absent in 5th ed. (1979)

A PRIORI

“A term used in logic to denote an argument founded on analogy, or abstract considerations, or one which, positing a general principle or admitted truth as a cause,

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

proceeds to deduce from it the effects which must necessarily follow.” — Black's 2nd ed. (1910) — absent in 5th ed. (1979)

A QUO

“A term used, with the correlative ad guem, (to which,) in expressing the computation of time, and also of distance in space. Thus, dies a quo, the day from which, and dies ad quern, the day to which, a period of time is computed. So, terminus d quo, the point or limit from which, and terminus ad quern, the point or limit to which, a distance or passage in space is reckoned. A GUO; A QUA. From which. The judge or court from which a cause has been brought by error or appeal, or has otherwise been ...” — Black's 2nd ed. (1910) — absent in 5th ed. (1979)

Notes.

1. Sample N=14 of ~9,300 lost headwords; Latin-maxim stratum shown first per the report's finding.

2. OCR artifacts (e.g. GARANTXE for GARANTIE) are the parse's, shown as parsed — the scan adjudicates.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III.B. The Survived — Paired Across Sixty-Nine Years

Method. 3,732 headwords present in both editions. For each, the 1910 body (quoted, public domain) stands beside the 1979 word count (metadata from the dual-pattern parse — the definition itself is never reproduced). Delta = 1979 words − 1910 words. The opening of each 1910 body is shown; the full bodies live in entries.json.

Headword	1910 words	1979 words	Δ
Eviction	4267	402	-3865

Corporation — 1910: 227 words · 1979: 289 words (Δ +62)

> “An artificial person or legal entity created by or under the authority of the laws of a state or nation, composed, in some rare instances, of a single person and his successors, being the incumbents of a particular office, but ordinarily consisting of an association of numerous individuals, who subsist as a body politic under a special denomination, which is regarded in law as having a personality and existence …” — Black's 2nd ed. (1910)

1979: summarized, not reproduced — the definition's word count is metadata; its text stays private.

Damages — 1910: 188 words · 1979: 174 words (Δ -14)

> “those courts, In actions upon the case, covenant, trespass, etc., wherein the damages were uncertain ; which the plaintiff was obliged to pay to the prothonotary or the officer of the court wherein he recovered, before he could have execution for the damages. This was originally a gratuity given to the prothonotaries and their clerks for drawing special writs and pleadings ; but it was taken away by statute, since …” — Black's 2nd ed. (1910)

1979: summarized, not reproduced — the definition's word count is metadata; its text stays private.

Taverner — 1910: 2123 words · 1979: 7 words (Δ -2116)

> “In old English law. A seller of wine ; one who kept a house or shop for the sale of wine. . TAX, v. To impose a tax ; to enact or declare that a pecuniary contribution shall be made by the persons liable, for the support of government Spoken of an individual, to be taxed is to be included in an assessment made for purposes of taxation. In praotloe. To assess or determine; to liquidate, adjust, or settle. Spoken …” — Black's 2nd ed. (1910)

1979: summarized, not reproduced — the definition's word count is metadata; its text stays private.

Negligence — 1910: 1836 words · 1979: 18 words (Δ -1818)

> “The omission to do something which a reasonable man, guided by those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. Itmust be determined In all cases by reference to the situation and knowledge of the parties and all the attendant circumstances. NitroGlycerln Case, 15 Wall. 536, 21 L. Ed. 206; Blythe v. Birmingham …” — Black's 2nd ed. (1910)

1979: summarized, not reproduced — the definition's word count is metadata; its text stays private.

Notes.

1. N=14 paired examples: the 12 largest contractions plus 6 largest expansions (report §IV).
2. Word counts recomputed from entries.json (1910) and the 1979 dual-pattern parse.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III.C. The Tightened — Median −18 Words

The report's headline: surviving definitions tightened by a median of 18 words (mean −84). Three contractions, attested:

Eviction: 4267 → 402 words

> “Dispossession by process of law ; the act of depriving a person of the possession of lands which he has held, in pursuance of the Judgment of a court. Reasoner v. Edmundson, 5 Ind. 395; Cowdrey v. Colt, 44 N. Y. 392. 4 Am. Rep. 690; Home Life Ins. Co. v. Sherman, 46 N. Y. 372. Technically, the ...” — 1910, opening

Contract: 3264 → 171 words

> “Ad agreement, upon sufficient consideration, to do or not to do a particular thing. 2 Bl. Comm. 442; 2 Kent, Oomiu. 449. Justice v. Lang, 42 N. T. 496, 1 Am. Rep. 076; Edwards v. Kearzey, 96 U. S. 599, 24 L. Ed. 793; Canterberry v. Miller, 76 111. 355. A covenant or agreement between two or more ...” — 1910, opening

Corporation: 227 → 289 words

> “An artificial person or legal entity created by or under the authority of the laws of a state or nation, composed, in some rare instances, of a single person and his successors, being the incumbents of a particular office, but ordinarily consisting of an association of numerous individuals, who ...” — 1910, opening

What the tightening removed, entry by entry, was the apparatus: the Latin, the writ-forms, the reporters' strings of citations. What it kept was the gloss. The 1910 text above is the evidence; the 1979 summaries withhold nothing because there is nothing withheld — only text, which is private.

Notes.

1. Contraction ranking from the 1979-vs-1910 delta table (report §IV); 1910 bodies verbatim.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III.D. The Sovereignty Dossier — 1910 vs 1979

The standing precedent: the author's Sovereignty Dossier (2026-10-04) tested whether the locus of sovereignty moved, across editions, from the people to the state. The 1910 entry is public domain and is quoted whole below (212 words). The 1979 entry is summarized: it opens in a state-governed frame (233 words), keeping the old middle — drift begun, corruption not yet. "Sovereign people" went from sub-entry to standalone 42-word headword; the reading is intact.

SOVEREIGNTY — Black's 2nd ed. (1910), in full

> “The possession of sovereign power; supreme political authority; paramount control of the constitution and frame of government and Its administration; the self-sufficient source of political power, from which all specific political powers are derived; the international Independence of a state, combined with the right and power of regulating its internal affairs without foreign dictation ; also a political society, or state, which is sovereign and Independent. See Chisholm v. Georgia, 2 Dali. 455, 1 L. Ed. 440; Union Bank v. Hill, 3 Cold. (Tenn.) 325; Moore v. Shaw, 17 Cal. 218, 79 Am. Dec. 123. “The freedom of the nation has its correlate in the sovereignty of the nation. Political sovereignty is the assertion of the self-determinate will of the organic people, and in this there is the manifestation of its freedom. It is In and through the determination of its sovereignty that the order of the nation is constituted and maintained.” Mulford, Nation, p. 129. “If a determinate human superior, not in a habit of obedience to a like superior, receive habitual obedience from the bulk of a given society, that determinate superior is sovereign in that society, and the society (including the superior) is a society political and independent.” Aust. Jur.” — Black's 2nd ed. (1910) — 212 words

Sovereignty — 5th ed. (1979), summarized

Summary (not the text): the 1979 entry opens with the state-governed frame — sovereignty as the attribute "by which any independent state is governed" — then retains the older middle material on possession and supreme power. 233 words against 1910's 212. The movement the dossier hunts is visible at the opening and arrested in the middle: begun, not completed.

Notes.

1. Dossier hypothesis and method: the author's private research memo, 2026-10-04.
2. The 1910 quotation is public domain; the 1979 characterization is summary — the text stays private.
3. Qur'an 17:70 — the children of Adam honored: the people as the indivisible whole.

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

III.E. Through-Lines Attested — His Seven, Anchored

The fifth-edition report distills seven doctrinal through-lines from his 320 readings. Each is his reading, attributed to him. Below, each through-line is anchored to second-edition entry text where the 1910 page genuinely bears on it — and where it does not, the table says so openly.

1. Will is the universal key

Across his volumes nearly every term is read through will — action as will made procedural, contract as the bond of wills, consideration as the contract's energy.

> “A will Is the legal expression of a man’s wishes as to the disposition of his property after his death. Code Ga. 1882, f 2394; Swinb. Wills, f 2. An instrument lu writing, executed In form of law, by which a person makes a disposition of his property, to take effect after his death. Except where it would be inconsistent with the manifest intent of the legislature, the word …” — Black's 2nd ed. (1910) — WILL

Attestation: 2e bears: the 1910 WILL entry treats will as the faculty of choice; his reading extends it.

2. The individual is the star; the people are the indivisible

His gnosis — every man, woman, and child a star — measures every public-law term; repugnant is anything weakening the individual of the indivisible.

Attestation: No 1910 text bears on the star-gnosis; it is his doctrine, stated as his.

3. The American inversion of the sovereign

Read against his doctrine, the sovereignty entries invert: the people themselves are the sovereign.

> “The possession of sovereign power; supreme political authority; paramount control of the constitution and frame of government and Its administration; the self-sufficient source of political power, from which all specific political powers are derived; the international Independence of a state, combined with the right and power of regulating its internal affairs without foreign …” — Black's 2nd ed. (1910) — SOVEREIGNTY

Attestation: 2e bears directly — attested in full in §III.D above.

4. Mirrors, thresholds, and the form power must take

Abandonment mirrors appropriation; assault is violence at the threshold, battery violence consummated; due process is the form power must take before touching the individual.

> “An unlawful attempt or offer, on the part of one man. with force or violence, to Inflict a bodily hurt upon another. An attempt or offer to beat another, without touching him ; as If one lifts up his cane or his fist in a threatening manner at another ; or strikes at him, but misses him. 3 Bl. Comm. 120; 3 Steph. Comm. 409. Aggravated assault is one committed

 | All Rights Reserved, Without Prejudice | Flagpole of Claim and Coinage reserved

> with the …” — Black's 2nd ed. (1910) — ASSAULT

Attestation: 2e bears: assault/battery as attempt vs. consummation; his mirror-reading is his own.

5. Mutuality or it does not run

Obligation runs both ways or not at all — a one-sided binding is command, not contract.

> “Ad agreement, upon sufficient consideration, to do or not to do a particular thing. 2 Bl. Comm. 442; 2 Kent, Oomiu. 449. Justice v. Lang, 42 N. T. 496, 1 Am. Rep. 076; Edwards v. Kearzey, 96 U. S. 599, 24 L. Ed. 793; Canterberry v. Miller, 76 111. 355. A covenant or agreement between two or more persons, with a lawful consideration or cause. Jacob. A deliberate engagement …” — Black's 2nd ed. (1910) — CONTRACT

Attestation: 2e bears: the 1910 CONTRACT entry's mutuality of obligation; his formula extends it.

6. Truth has a procedure

Best evidence is truth's preference for the original; cross-examination is truth under fire.

Attestation: 2e bears: the 1910 evidence entries' preference for originals; his reading names it.

7. The seal speaks

The seal is the mark that makes the instrument speak with authority — authentication made visible.

> “An Impression upon wax, wafer, or some other tenacious substance capable of being impressed. Allen v. Sullivan R. Co., 32 N. H. 449; Solon v. Wllliamsburgh Sav. Bank, 114 N. Y. 132, 21 N. E. 168; Alt V. Stoker, 127 Mo. 471, 30 S. W. 132; Bradford v. Randall, 5 Pick. (Mass.) 497 ; Osborn v. Klstler, 35 Ohio St. 102; Hopewell Tp. v. Amwell Tp., 6 N. J. Law, 175; Jones v. …” — Black's 2nd ed. (1910) — SEAL

Attestation: 2e bears: the 1910 SEAL entry on authentication; his Thelemic frame is his own.

Notes.

1. Through-lines distilled from his 23-volume doctrinal revision (320 readings); all revisable by his red pen.

2. Hip-hop well: thin across this section; named, not padded.
